WANTED
Full-time Ph.D. students in Education or in Psychology with a strong quantitative background. Selected fellows will be trained in specialized quantitative methodological skills that can address many theoretical and practical issues in education and psychology. Training will include a focus on measurement issues associated with assessing students with special needs.

BENEFITS
• Full living stipend
• Tuition and health insurance
• Training in higher education instruction
• Exposure to (and research opportunities with) national and international experts in quantitative research methods, psychometrics, and assessment of students with special needs

ELIGIBILITY CRITERIA
• Strong mathematics or quantitative background
• Commitment to the field of educational assessment, psychometrics, or quantitative research methods
• U.S. citizen or permanent resident
• Demonstrated financial need
• Student in the Ph.D. programs in the Graduate Group in Education or in the Psychology Department at UC Davis (can enroll as late as Fall 2017)

Fellowships supported by:
The U.S. Department of Education, Graduate Assistance in Areas of National Need (GAANN) Program and The University of California, Davis
