

Caring for Clear Lake

Research-backed environmental education modules now available for educators

Informed by Tribal and community ecological knowledge, expertise, and priorities, these four modules engage youth in local scientific efforts to restore Clear Lake. The activities within the modules highlight the work of partners, analyze locally-sourced data, utilize participatory science projects, and integrate culturally relevant perspectives on restoration and caretaking.

OUR ENVIRONMENT

OUR COMMUNITY

OUR RESPONSIBILITIES

OUR FUTURE

Topical modules built to support local programming

Educators can integrate these free modules and activities anywhere around the lake.

The materials target grades 3 through 5, but can be easily adapted for different ages.

Each module focuses on a priority environmental issues identified by the community:

Biodiversity, *Our Environment*

Water quality, *Our Community*

The watershed, *Our Responsibilities*

Good fire, *Our Future*
