

CCS Collabinar

SciStarter Education:

A new, pilot, Ed-Tech platform to integrate facilitator-led citizen science in schools through district- and school-wide approaches

About the presentation:

We will be collaborating with **Darlene Cavalier**, founder of SciStarter, and learning about the work SciStarter is doing with middle schools in Florida's Broward County School District. **Sheryl A. Arriola** will also join us to discuss the professional development module she created for Broward County teachers.

Friday, May 17, 11 AM

- **11:00-12:00 PM:** presentation and discussion
- **12:00-1:00 PM:** optional sharing and workshopping

Participate online or in-person.

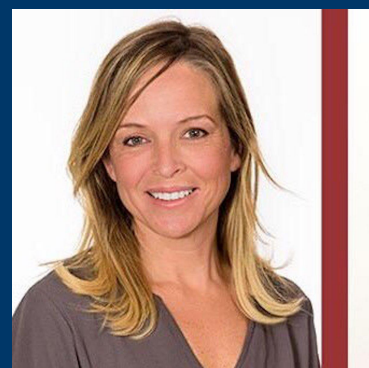

1460 Drew Ave
Davis, CA 95616

RSVP:
<http://bit.ly/Collabinar04>

The **CCS Collabinar** invites our partners from across the globe to bring us their most exciting challenges and opportunities in community and citizen science. Each event supports mutual learning, and advances projects and partnerships.

Topics to be discussed:

- How might CitSci scholars measure the impact of this work?
- Suggestions on scaling to other districts and broadening the scope to include other projects, particularly given the challenges of working with people under 13 years of age.

Presenter:

Darlene Cavalier—

Founder, SciStarter; Professor of Practice, School for the Future of Innovation in Society at Arizona State University; Darlene's work centers around public engagement in science, particularly citizen science.
